WHY FIX MY FOUNDATION?

Your home is your most valuable investment and protecting it is a top priority. Many homes in our area experience foundation settlement due to the unstable soils in the region. Foundation settlement can result in cracking and buckling of walls and floors as well as other structural damage that may be less visible but no less serious.

In business for over 20 years, Florida Foundation Systems is ideally suited to oversee your project from permitting through inspection, using our technical expertise and network of industry professionals to permanently remediate your foundation settlement.

OUR SERVICES INCLUDE

- ▶ Helical Piles for Home Additions
- ▶ Foundation Underpinning
- ▶ Helical Anchors for Uplift
- ▶ Tie Backs for: Seawalls, Sheet Piles, Canopies
- ▶ Resistance / Push Piers
- ▶ Pilings for New Pools
- ▶ Underpin Existing Pools
- ▶ Raise and Stabilize Foundations, Walls and Slabs
- ▶ Pile Load Testing
- ▶ Preliminary Engineering Design
- ▶ Chemical Grouting
- ▶ Poly Slab Raising / Void Fill
- ▶ Limited Access Specialists

HELICAL PILES

Ideal for for new construction, remodeling and underpinning, helical screw piles can be rapidly installed with small equipment for immediate compression/tension loading with minimal ground disturbance.

PIN PILES

These piles are a cost effective choice for light load structures such as: pool equipment slabs, pool decks, generator pads, privacy / retaining walls.

RESISTANCE/PUSH PIERS

These piles are designed to underpin existing concrete foundations to stabilize and stop settlement. In some cases, a structure may be raised back to its original level position.

MICRO PILES

The Helical Pulldown Micro Pile brings the advantages of a pre-engineered helical pile to higher load applications, increasing capacity and material longevity by encasing the pile shaft in a high strength grout column.

POLYURETHANE SLAB RAISING AND CHEMICAL GROUTING

Lift Slabs

Repair Seawalls

Seal Leaks

Stabilize Soils
